GLP-1s have transformed weight loss and diabetes. Is addiction next?

Jon Hamilton · 2026-03-10

A large study found that people taking GLP-1 drugs like Ozempic for diabetes were less likely to be diagnosed with substance use disorder.

A study of over 600,000 veterans found that GLP-1 drug users had roughly 15% lower rates of substance use disorders, suggesting these medications may modulate brain reward pathways beyond their metabolic effects.
